### **DETAILED ACTION**

The following is an examiner's statement of reasons for allowance: The prior art made of record, namely Bressler et al. (2003/0181874), did not disclose or suggest a safety needle assembly comprising a first finger tab including a camming surface adapted for engagement with a latch mechanism to release said latch mechanism. The prior art also did not disclose or suggest a method for passively activating a safety needle assembly wherein the grasping step causes movement of said first finger tab which causes said camming surface to cam said tab out of frictional engagement with said recess or opening in said shield.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
